MEMORANDUM

All Design Units: _____

The Supplementary Specifications for all future projects which contain work in the vicinity of railroad tracks and which require railroad insurance provisions shall contain a schedule of train movements and speeds of operation.

At those locations where trains are running continually all day, it will be sufficient to list only the number of trains per day along with speeds of operation. Where there are only occasional movements the time and speed for each movement should be listed.

A handwritten signature in cursive script, appearing to read "Edwin Jones".
